Airless devices and accessories

Airless devices

Airless devices are extremely wear-resistant piston pumps. The Putzmeister airless devices, will enable you to finish your painting works quickly and to the highest quality. Working with the airless

devices can save you up to 50% working time compared to the traditional paint roller application.

	A 190*	A 270*	A 450*
Delivery rate	max. 1.9 l/ min	max. 2.7 l/ min	max. 4.45 l/ min
Working pressure	up to 230 bar	up to 230 bar	up to 230 bar
Electric drive	0.85 kW	1.35 kW	1.8 kW
Weight	14.5 kg	29.5 kg	43 kg

*available off 01/2008

Accessoires généraux

Spray fine plaster or concrete bonder, roll or spray paint... The number of different applications for our products is practically endless. However, for each type of application, we can provide you with the ideal accessory – either individually or as part of a practical kit.

This not only makes your work easier, but also achieves better results. Our paint roller, for instance, lets you apply your paint twice as fast – and always in the right quantity. Our spray guns and nozzles are perfectly adapted to the output of our worm pumps. But besides this, we can also offer you an extensive range – full of good ideas to enable you to achieve your best work.

Putzmeister Mörtelmaschinen GmbH

The company is a 100% subsidiary of Putzmeister AG, registered headquarters in Aichtal near Stuttgart, Germany.

Since 1958, Putzmeister has been a manufacturer and world-wide provider of mortar machines, fine plaster spray and paint pumps, concrete pumps, tunnel machines, industrial pumps, large robotics for cleaning complex systems and facilities and of professional high-pressure cleaning systems. This strong network offers users and sales partners ideal con-

Worm pumps, continuous mixers, tool washing systems and compressors

Strobot worm pumps

The Strobot worm pumps are light weight and easy to use. The 230 V electric motor speed is controlled either by rpm-control or by pressure and ensures a constant delivery rate and thus an even spray pattern. The output can be adjusted infinitely de-pending on the

quantity required. The large hoppers can be simply removed. This makes cleaning fast and easy.

Strobot	204 S	401 S	406 S
Delivery rate	0 - 5 l/ min	0 - 11 l/ min	0 - 15 l/ min
Working pressure	20 bar	30 bar	30 bar
Delivery distance	up to 25 m	up to 38 m	up to 48 m
Electric drive	0.55 kW	1.5 kW	2.2 kW
Max. grain size	3 mm	4 mm	6 mm
Dimensions	102 x 58 x 77 cm	110 x 58 x 77 cm	120 x 58 x 77 cm
Weight	35 kg	50 kg	65 kg

Strocomp compressors

Our Strocomp compressors ensure a high performance and guarantee an optimum spray pattern in combination with our Strobot worm pumps.

They are small, light, stable and easy to transport thanks to their single-axle chassis. They can be operated everywhere with their 230 V connection.

Strocomp	433	864
Suction volume	400 l/ min	800 l/ min
Output performance	300 l/ min	550 l/ min
Maximum pressure	10 bar	10 bar
Motor output	2.2 kW	1x or 2x 2.2 kW
Dimensions	81 x 47 x 52 cm	75 x 55 x 61 cm
Weight	67 kg	71 kg

Stromixer continuous mixer

If you want to process mineralic dry mortar, the Stromixer D 1000 is the ideal add-on to our Strobot worm pumps.

It proves its value through excellent mixing results and it's compact design. All parts are made from rust-free material (e.g. stainless steel) and are easy to clean. Once the work has been completed, you can simply take the removable control console with you for protection against frost or theft.

Stromixer	D 1000
Electric drive	1.5 kW, 230 V/ 50 Hz
Mixing performance	up to 15 l/ min
Dimensions	98 x 70 x 95 cm
Weight	95 kg

Strobber tool washing systems

Strobbers are washing systems you can use to thoroughly clean not only rollers but also your worm pumps.

The dirty water flows from the removable basin into a filter system. In the filter system, smaller and bigger particles are separated from the water. It is then automatically pumped from the container to the drain.

This all takes place in a closed system and thus provides protection against unpleasant smells.

With the optional Strobber WAB water processing plant, a reaction separating agent is added to the wastewater which is then additionally cleaned and processed.

Strobber	WA 800	WA 1500
Dimensions	80 x 80 x 134 cm	80 x 150 x 134 cm
Roller cleaner	10 l/ min, 25 bar, 8 nozzles	
Filter	Stainless steel basket with fabric filter	

With the optional roller cleaner, it will only take a matter of seconds to clean your rollers.
